DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Tajiri et al.(EP 0 851 414).

Claims 1 and 6, figure 26 discloses components for detecting an optical signal(4b) without an objective lens, a resin metal frame(21B) housing the components, and a metal frame(142) mounted on the resin(21B) where the components for detecting an optical signal(4b) are bonded to the metal frame(142b) and a portion of the metal frame(142b) is vertically bent to the shape of the resin package(21B).

Claim 2, the components for detecting an optical signal include an optical pickup unit(page 12, col. 1).

Claim 3, the metal frame(142) is independently disposed for each of the laser devices(not numbered) to be bonded.

Claims 4-5, the metal frame(21) radiates heat via the resin package to a metal part(133) disposed outside the resin package.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fujimaki et al.(5,309,460) and Kamibayashi et al.(6,090,642) combine to disclose the recited elements.
